

Future Trends

Mohammed Alhariqi

April 2024

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Web-based technologies, notably JavaScript and HTML, reign as the most popular.
- Within the realm of web frameworks, React.js and jQuery stand out as particularly dynamic.
- Windows and Linux continue to dominate as the preferred platforms for development.
- Android indisputably leads the mobile platform landscape.
- While MySQL maintains its position as the most widely used database, MongoDB and PostgreSQL show promising trends for future adoption

INTRODUCTION

- This presentation has been created for stakeholders and business decision makers within global IT and business consulting services firm
- The primary objective of the annual surveys is to gather data regarding technology usage and trends among developers.
- The comparison between current & next year technology trend will provide great inside into the market.
- The study consist of 4 main parts:
 - Top language using
 - Top database using
 - Top platform using
 - Top web frame using

METHODOLOGY

- ❖ **Data Wrangling:** A portion of the dataset (provided by IBM) was loaded and cleaned using SQL and Python's pandas library.
 - Cleaning procedure: Duplicates removal, data imputation, data Normalization
- ❖ **Analysis & Visualization:** EDA and data visualization were conducted using various Python libraries and Cognos. Specifically, the following measures were examined:
 - Technologies (i.e., languages, databases, platforms, and web frames used in 2019)
 - Technologies most desired for the next year
 - Demographics (i.e., gender, country, age, and education).

RESULTS

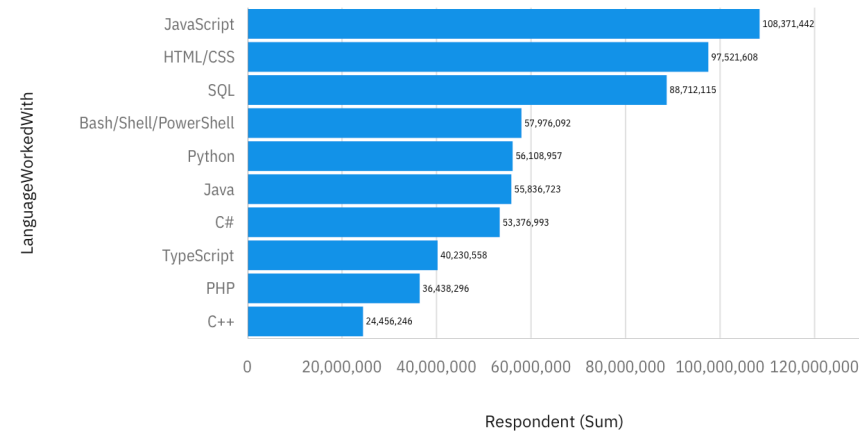

- The results consists of 4 main parts:
 - Programming language trend
 - Database trend
 - Platform trend
 - Web frame trend

PROGRAMMING LANGUAGE TRENDS

Current Year

Top 10 Languages Currently

Next Year

Top 10 LanguageDesireNextYear

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

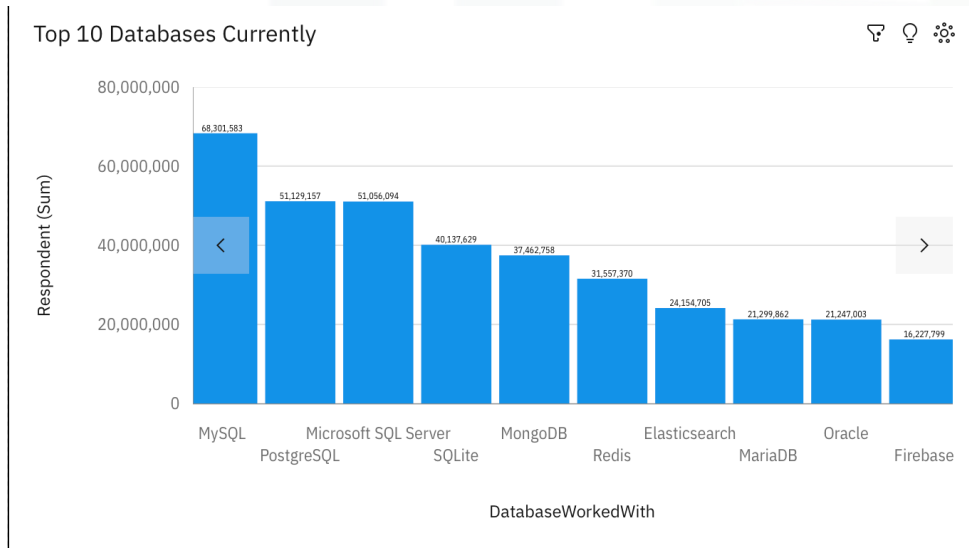

- JavaScript & HTML/CSS are top programming languages for both current and future trend.
- Python moves from 5th position to 2nd position in top 10.
- C++ and PHP are disappearing from top 10.

Implications

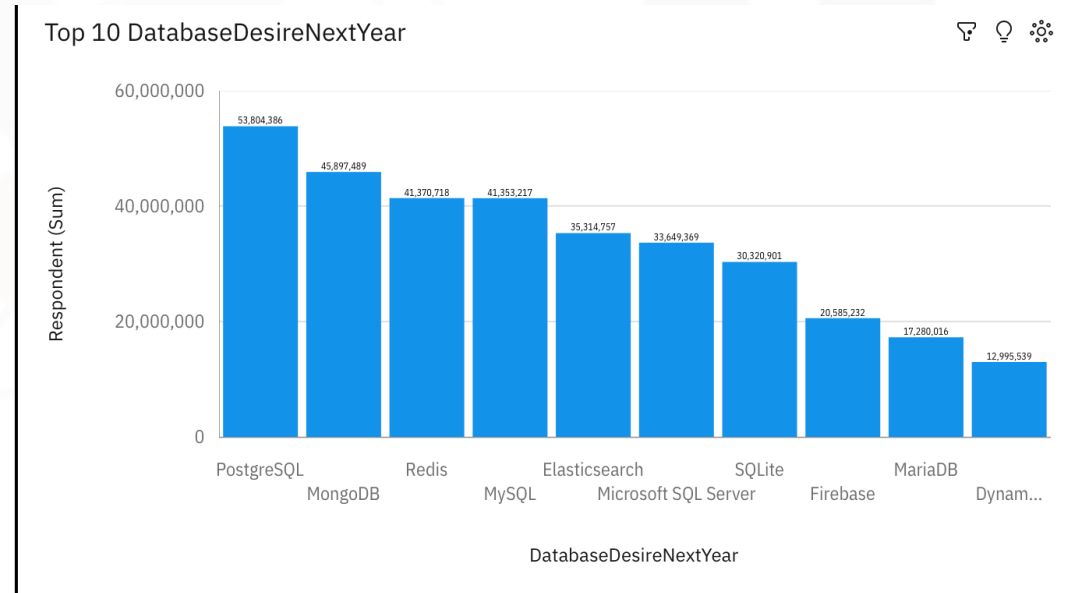

- Web programming languages still stay dominance in near future.
- Python & data science is becoming more and more important.
- Legacy language such as C++, PHP ... are gradually falling out of interest.

DATABASE TRENDS

Current Year

Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- MongoDB & Redis quickly moves up to No.2 and No.3
- PostgreSQL moves from No.2 to No.1
- MS SQL server drops from No.3 to No.6
- Oracle disappear from top

Implications

- Open source database becomes more and more popular compared with commercial one.
- Non-relational database see increasingly usage in the future.
- Relational database still takes a leading position in the near future.

PLATFORM TRENDS

Current Year

PlatformWorkedWith

2,532,293 72,858,619

- Docker
- IBM Cloud or Watson
- MacOS
- Raspberry Pi
- WordPress
- Google Cloud Platform
- Kubernetes
- Microsoft Azure
- Slack
- iOS
- Heroku
- Linux
- Other(s):
- Windows

PLATFORM TRENDS - FINDINGS & IMPLICATIONS

Findings

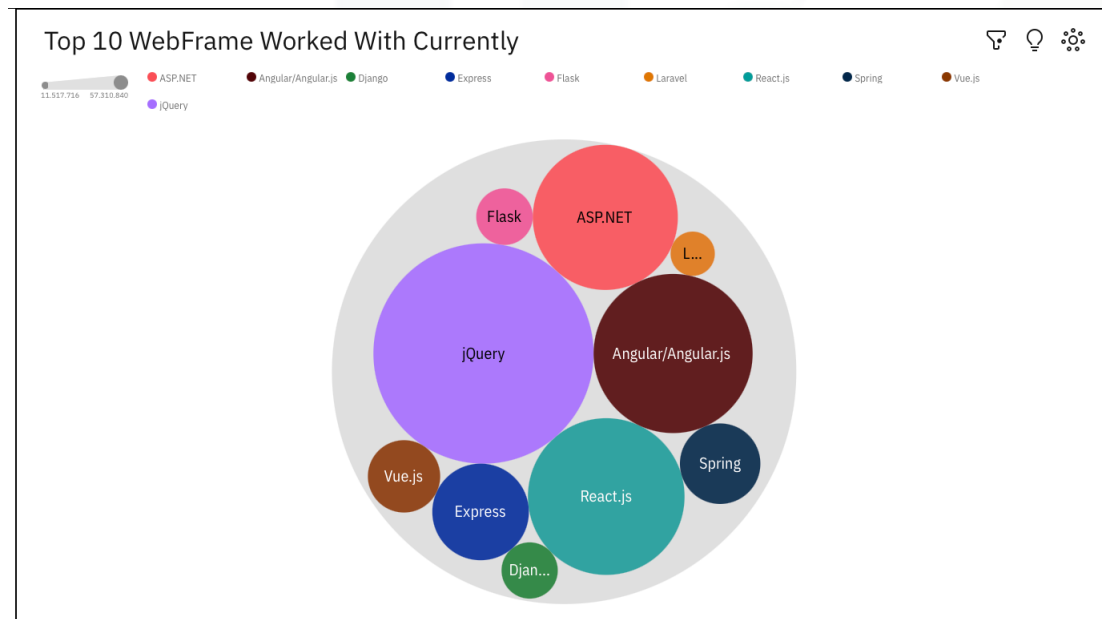

- Windows and Linux still dominates the platform trend.
- Android is No.1 in mobile platform.
- Cloud platform such as Kubernetes, Docker, AWS is getting more and more market share.

Implications

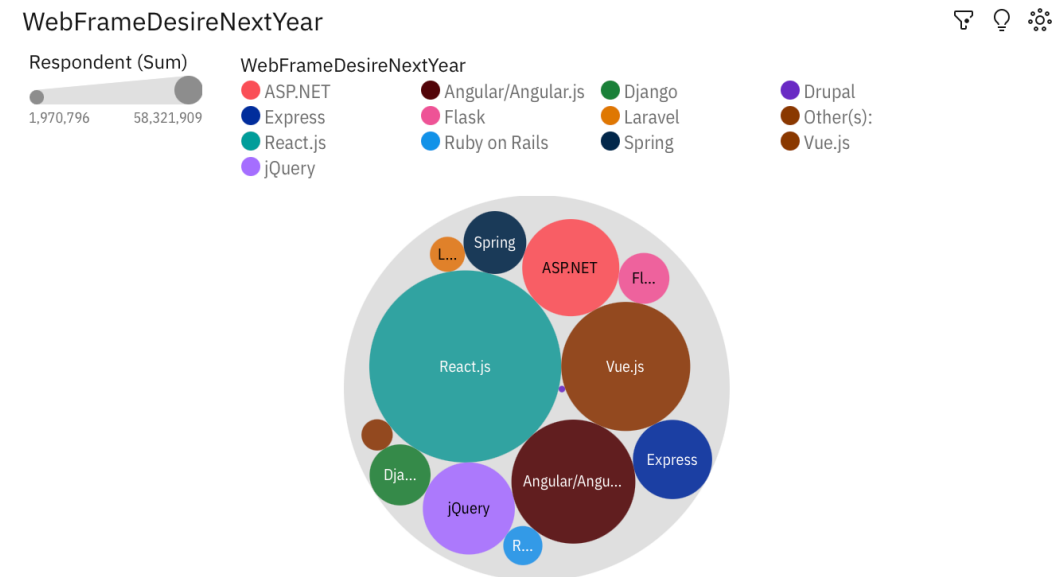

- Windows and Linux are still main developing platform in a foreseeable future.
- The transformation to cloud computing is a non-reversible process.

WEB FRAME TRENDS

Current Year

Next Year

WEB FRAME TRENDS - FINDINGS & IMPLICATIONS

Findings

- jQuery decreases from No.1 to No.5.
- React.js moves up from No.3 to No.1
- Vue.js moves from No.9 to No.2.
- Angular.js stays at same position.

Implications

- jQuery quickly loses market share show lack of interest in its future development.
- React.js and Vue.js becomes the new standard for web frame development.

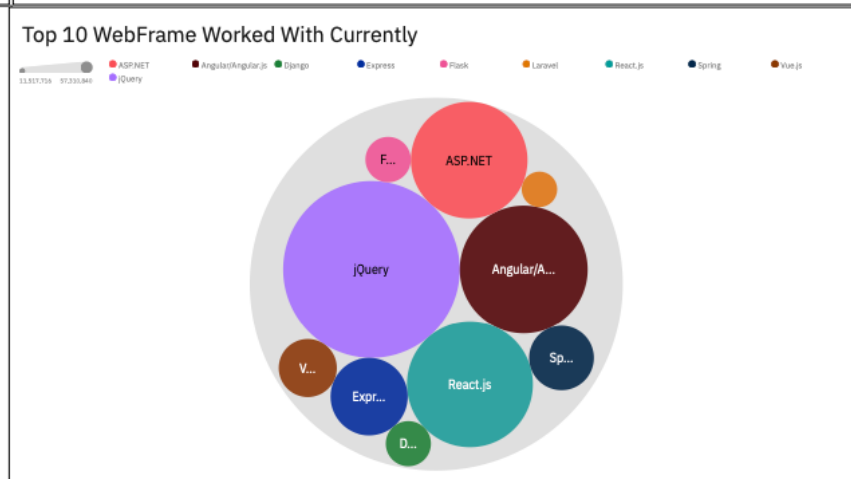

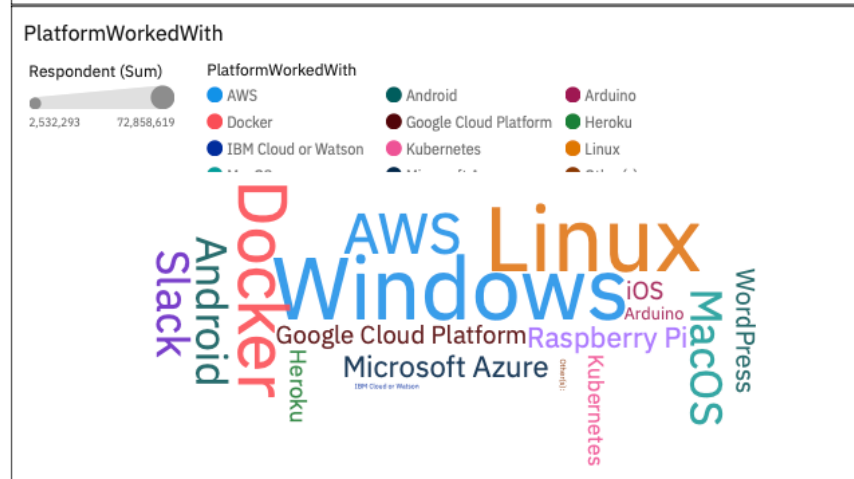

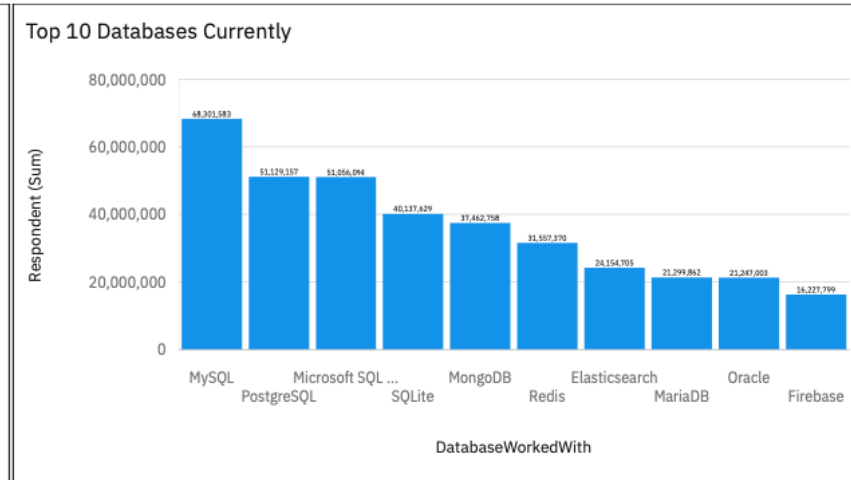

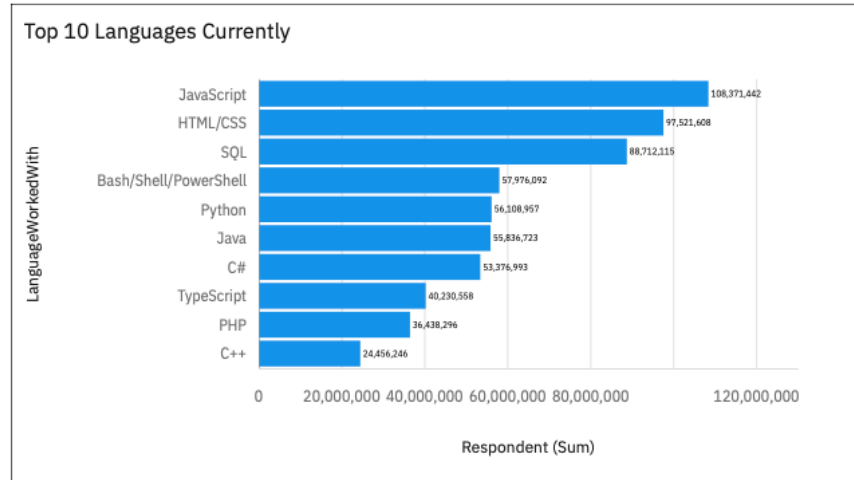

DASHBOARD

https://us1.ca.analytics.ibm.com/bi/?perspective=dashboard&pathRef=.my_folders%2FCapstone%2BProject%2BDashboards&action=view&mode=dashboard&subView=model0000018ee56bdb7b_00000000

DISCUSSION

OVERALL FINDINGS & IMPLICATIONS

Findings

- Web based language stays at No.1
- Non-relational database moves to No.2 & No.3
- Cloud-based platform moves to No.1
- React.js stays at No.1 on web framework.

Implications

- Web based application is taking over the traditional application.
- Non-relational database sees increasing adoption.
- Cloud-based services become top-choice for platform development.

CONCLUSION

- To stay relevant in the technology field, it's important to learn web-based language & non-relational database.
- Among web framework, React.js is the best to learn for your future.
- Cloud-based service is the right direction for IT investment.
